Project Design Phase-I Proposed Solution Template

| Project Name | Virtual Eye - Life Guard for |
|--------------|---------------------------------|
| | swimming pools to detect active |
| | drowning |
| Team Name | Dementors |

Proposed Solution Template:

| S.No. | Parameter | Description |
|-------|-----------------------------|---|
| 1. | Problem Statement | Drowning detection system that detects |
| | (Problem to be | every dangerous situation and accident. |
| | solved) | This software works in close integration |
| | , | with the cameras installed in the pool to |
| | | continuously scan the pool. |
| | | This system can also able to record all |
| | | the activities in the pools and to classify |
| | | critical situations from normal ones in |
| | | order to keep track of what happened. |
| | | The built-in notification system |
| | | produces alarms within 10 seconds on |
| | | smartwatches, phones, flashing lights and |
| | | other configurable devices. |
| | | Thus a meticulous system is to be |
| | | implemented along the swimming pools |
| | | to save human life. By studying body |
| | | movement patterns and connecting |
| | | cameras to artificial intelligence (AI) |
| | | systems we can devise a pool safety |
| | | system that reduces the risk of drowning. |
| | | |
| | | |
| 2 | Idea / Calution des des | |
| 2. | Idea / Solution description | This system by analyzing the movement |
| | | and shape, evaluates swimmers' condition |
| | | based on visual based monitoring device |
| | | and an alarm to alert the lifeguards and |
| | | provides solution in detecting drowning |

| | | incidents. |
|----|-----------------------------|--|
| | | While challenging in many aspects, a |
| | | successful system will bring inestimable |
| 2 | Novelty / Uniqueness | value in saving human lives. |
| 3. | Novelty / Uniqueness | Virtual eye has developed a novel idea of |
| | | alerting the ambulance and another life |
| | | guard if there is any delay in saving the |
| 4 | | person to death. |
| 4. | Social Impact / Customer | Drowning produces a higher rate of |
| | Satisfaction | mortality without causing injury to |
| | | children. |
| | | Children under six of their age are found |
| | | to be suffering the highest drowning |
| | | mortality rates worldwide. Such kinds of |
| | | deaths account for the third cause of |
| | | unplanned death globally, with about 1.2 |
| | | million cases yearly. |
| | | To overcome this conflict, a meticulous |
| | | system is to be implemented along the swimming pools to save human life. |
| | | By studying body movement patterns and |
| | | connecting cameras to artificial |
| | | intelligence (AI) systems we can devise an |
| | | underwater pool safety system that |
| | | reduces the risk of drowning. |
| 5. | Business Model (Revenue | There are many products currently |
| | Model) | available in this regard. |
| | · | Our solution, once developed well, has |
| | | enough possibility to become a good |
| | | product to save drowning victims. |
| 6. | Scalability of the Solution | Our proposed solution is very scalable i.e., |
| | | in future, there are a lot of rooms |
| | | forevolving our present model by |
| | | |
| | | Adding new features to enhance our |
